

Battery positive hooked up to fuse is done last

Battery negative as is, no modifications.

Pin #87 from each relay to one power lug on HHO unit. May need to extend wires to reach, depending on installation.

4 relays wire color may differ

Pin #30 on all relays, from bus bar

Pin #85 from each relay to ground

Pin #86 from each relay to one of four control wires from switches. Colors do not matter just from a switch to a relay.

Applied Hydrogen Technologies, Inc proper wiring of HHO unit control relays, and HHO unit

White wire from dash harness to box temperature sending unit. Black wire not used at this time.
